Education

Galgotias University

Bachelor of Technology in Computer Science

CGPA: 8

Aug 2019 – June 2023

Greater Noida, Uttar Pradesh

Experience

Cyclotron, Inc

Software Developer Trainee

January 2024 – present

Remote

- Developed and integrated applications using **Microsoft Graph**, **SharePoint Framework**, and **Microsoft Copilot** for enhanced productivity and data management.
- Built dynamic and responsive user interfaces with **ReactJS** and **jQuery**, improving user experience and interactivity.
- Developed and deployed **message extensions** for Microsoft Teams, boosting team communication efficiency by 40% and user engagement by 25%.

AssessPrep

Front End Developer Intern

Sep 2023 – Nov 2023

Gurugram, India

- Designed and implemented user interfaces with **HTML5**, **CSS3**, and **JavaScript**.
- **Increased user engagement by 15%** through interactive **ReactJS** components for diverse assessment types (MCQs, drag-and-drop, open-ended essays) with optimized state management and hooks. Implemented **lazy loading** and memoization for enhanced efficiency.
- Built assessment modules with real-time feedback and gamified elements, leveraging **Redux** for effective state management and handling asynchronous operations.
- Resolved UI issues for mapped students, addressing join code problems, resulting in a 20% increase in test initiations and improved test accessibility. Closed an AI model loophole to prevent non-numeric values in questions, reducing data inconsistencies by 15%.

Nokia

Intern

Aug 2022 – July 2023

Chennai, India

- Automated data upload to UIV (Unified Inventory) project with a **Python script**.
- Engineered and implemented a release notes generator using **Python** and **XML**, enhancing project documentation and saving 10 hours per week, enabling team members to focus on critical tasks and **increasing project efficiency by 40%**.
- Containerized key application using **Docker**, improving deployment speed and resource utilization. Integrated Docker with **CI/CD pipeline** for automated builds, deployments, and scaling.
- Created a Power App for streamlined time booking and utilizing Power Automate in SharePoint to monitor expiring demands. Effectively impacted users by generating consolidated emails for timely follow-up and extension requests, showcasing expertise in Power Platform and workflow automation.

Projects

Expense Tracker | *HTML5, Tailwind CSS, ReactJS, React router*

[Github Link](#)

- Built a user-friendly expense management system, employing technologies such as **ReactJS** and **Router** to enhance navigation and provide a seamless experience for users in effortlessly entering and categorizing expenses.
- Implemented data persistence mechanisms using local storage, ensuring data integrity and responsiveness.

MovieSpace | *HTML5, CSS3, JavaScript, PHP, SQL*

[Github Link](#)

- Created a responsive social media website designed for movie and TV series enthusiasts to share reviews. It features secure user registration and login functionalities with **password hashing**.
- Developed features like post creation, comments, friend connections, and personalized content feeds.
- Leveraged **PHP** for back-end development and **SQL** for database connectivity. Achieved a **30% increase in user engagement** through post interactions and comments.

Technical Skills

Languages: C++, JavaScript, SQL

Technologies/Frameworks: HTML5, CSS3, ReactJS, Tailwind CSS, PHP, Git, GitHub

Developer Tools & Other: VS Code, Webpack, SDLC, CI/CD, OOP, Rest API's

Achievements

- **Leetcode Profile** - Max Rating 1563
- Secured **Global rank 4615 out of 25000+** participants in Leetcode Weekly Contest 357.
- **GeeksForGeeks Profile** - Solved 250+ problems.
- **Copilot for Microsoft 365 Technical Champion**
